

LUIS CÉSAR

FULL STACK DEVELOPER

PROFILE

Full Stack developer focused on end-user experience. I love leveraging technology to create products that provide real value to the final user. My main goal is to have the code written to have a real positive impact on customers. Currently working on Plan-et, an application built in Ruby on Rails and deployed in Heroku that allows users to create and share travel itineraries to inspire other travelers.

PROJECTS

Plan-et

Web app to create and share travel itineraries. The goal is to have travelers explore pre-created itineraries to gain inspiration for their own travels.

The app is built on Ruby on Rails, using PostgreSQL as DBMS and it's deployed in Heroku. It uses AJAX and jQuery to provide the best UX for the user.

For this project I did a lot of scrapping to create a small database containing hotels, restaurants, and attractions from different cities. The app access this info via a self-made API.

Hom-et

Platform to offer and schedule meals and experiences hosted in local households with the aim of connecting tourists and local people.

This app enables travelers to make new connections with local people. It allow users to learn about the different cultures and also allow the travelers to learn about the local traditions.

It was made on Ruby on Rails, it is hosted on Heroku and uses PostgreSQL as DBMS.

EXPERIENCE

IT Support specialist

Kronos | February 2018 - present

- I set up, manage, and support all the IT assets of Kronos Latin America.
- I provide on-site support to approximately 50 Kronos employees in Mexico and remotely to hundreds of Kronos employees around the world, mainly in english.
- I standardized the process of the set-up of new laptops in Latin America to provide the corporate more visibility and control over the systems of the region.

Web Designer and Online Content Manager

CBC Group | 2016 - 2018

I managed the online presence of the company and increased traffic to the website by performing the following actions:

- Modernize the image of the company by creating a brand new website from scratch, capable of attracting new leads.
- Create a Google Ads campaign.
- Improve SEO positioning.
- Add e-commerce functionality to the website.

EDUCATION

Unitec
